Source: U.S. Census Bureau, Population Estimates Branch, Estimates of Subcounty Population for 2000-2008, released July 1, 2009. These estimates were prepared by the U.S. Census Bureau through the Federal-State Cooperative for Population Estimates. Table prepared by the Library of Michigan.

Notes: The "Estimate Base" differs from the census count due to (1) boundary changes between January 1, 2000 and January 1, 2008, as reported in the Boundary and Annexation Survey; (2) census corrections made through the Count Question Resolution program; and (3) other geographic corrections made by the Census Bureau.

The Census Bureau's population estimates are sometimes referred to as "mid-year" or "July" estimates. However, they do not reflect seasonal population movements. The difference between the estimates base and the population estimate for 2000 reflects one-quarter of the estimated population change between 1999 and 2000. Each subsequent estimate reflects one year of population change relative to the prior estimate. Migration among states and counties is primarily estimated upon the basis of addresses reported on federal tax returns that are filed in the first quarter of each year.

"n.a." indicates that a cell is not applicable because a geographic unit did not exist in the 2000 Census or because it disincorporated after the
